Producent	Plast-Farb

Opis produktu

Special edition of courier envelopes or so-called polymailers. Made of special black and white film with a thickness of 50mic. Our polymailers have the prestigious Blue-Angel certificate, which approves that they are made of at least 80% PCR. The polymailers we produce provide excellent protection against mechanical damage and weather conditions. Our envelopes are made of a black and white film, which is completely opaque making it impossible to see the contents of the envelope. An additional guarantee for the safety of products packed in our polymailers is the hot-applied adhesive strip, which prevents the envelope from being opened without damaging it at the same time.

Every consignment of VAT invoices.

Performance of the contract after receiving the payment.
